 acteon

our vision our mission

We believe healthcare is first and foremost about quality of life. Medical treatments are more than just procedures, they restore health, comfort, confidence and happiness and improves life of millions of patients every year. Our vision is to pave the way of a more human-centered healthcare industry based on proactive lifetime care.

To remain at the top of their game and focus on what matters most, healthcare professionals trust integrated solutions that empower them and improve their practices on a daily basis. We provide comprehensive, intuitive workflow solutions that put technology at the service of people and help healthcare professionals restore patients' health effectively, efficiently, and economically.

About Prophylaxis workflow

This combination of solutions helps dentists easily prevent and diagnose potential dental problems such as periodontal disease and tooth decay. It also allows to perform safe and minimally invasive procedures, providing best care and comfort for patients.

Diagnosis

To ensure a reliable diagnosis, I need to get a quick and clear view of initial signs of caries, periodontal disease, and other conditions.

C50

C50 intraoral camera is the perfect companion for non-invasive and reliable caries detection, thanks to its fluorescent technology.

Treatment

I wish to carry out fast and accurate treatment, while reducing hand fatigue.

newtron

Newtron® P5XS B.LED and Bliss™ is the perfect combo to preserve tissues with efficacy and precision. Less force is needed for more comfort.

Air polishing

It is important for me to control the progression of the disease, without neglecting the comfort of my patient.

air-n-go easy

With Air-N-Go® easy, provide a gentle and effective treatment that limits bleeding. Stains and bacterial plaque are removed even in hard-to-reach areas.

Follow-up

In order to educate my patients for better treatment acceptance, I need to highlight the results of my dental care.

C50

C50 provides a reliable and immediate check of the clinical condition. The images can be shown to the patient and saved to his file.

Protection

I need to ensure optimal clinical protection for my patients and limit the risk of cross-contamination.

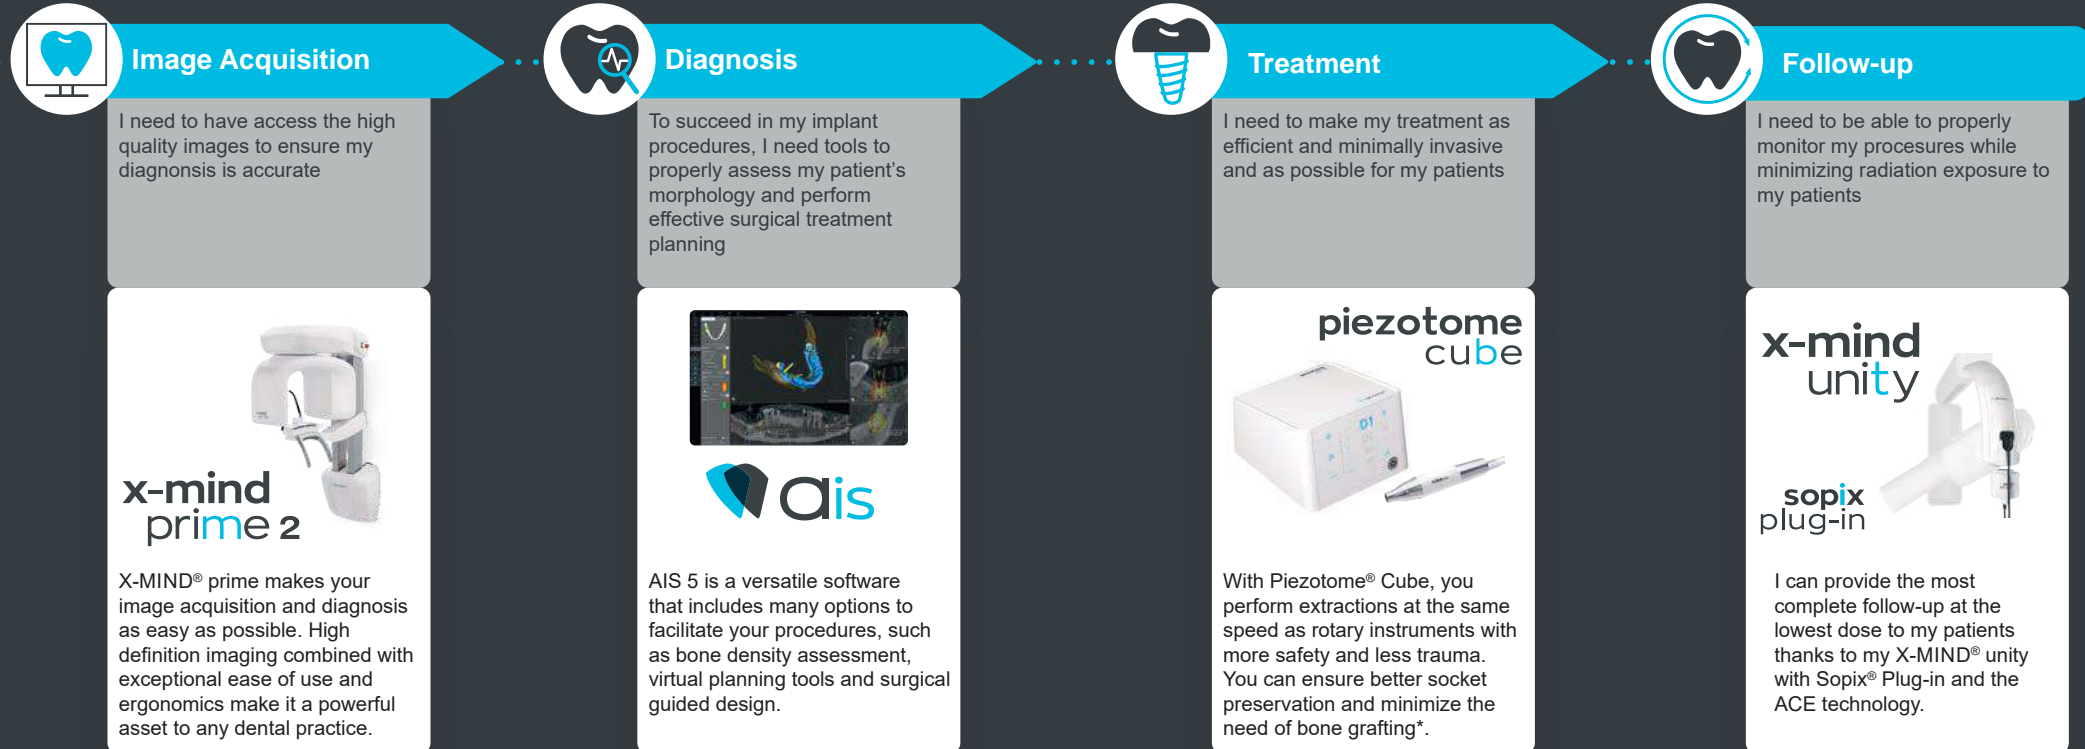

riskontrol

Riskontrol® disposable tips are your must-have solution to perform dental care in a safe and clean place. It assures protection, comfort and safety in every daily clinical procedures.

About Implantology workflow

ACTEON®'s implantology workflow leverages its expertise in different areas of the dental care pathway to help practitioners address some of the challenges associated with implantology to facilitate treatment, reduce treatment costs, increase surgical success, reduce chair time and improve the patient experience.

* Troedhan A, Kurrek A, Wainwright M. Ultrasonic Piezotome surgery: it is a benefit for our patients and does it extend surgery time? A retrospective comparative study on the removal of 100 impacted mandibular 3rd molars. Open Journal of Stomatology. 2011;1:179-184

About Digital Prosthesis workflow

ACTEON® digital prosthesis workflow allows practitioners to create effectively both functional and aesthetic smile, and to ensure patients' satisfaction. When it comes to complete prosthetic procedures, our top-of-the-range and innovative products help dentists to perform precise and predictable procedures while delivering the best patients' treatment experience.

Diagnosis

I need to have access to the high quality images to ensure a reliable diagnosis.

x-mind prime 2

X-MIND® prime makes your diagnosis as easy as possible. High definition imaging combined with exceptional ease of use and ergonomics make it a powerful asset to any dental practice.

Preparation & Treatment

I need to make my preparation and treatment as efficient and minimally invasive as possible for my patients.

expasyl exact

Achieve a perfect painless preparation and treatment for your patient with facilitated emergence profile access thanks to Expasyl™ Exact and dedicated Perfect Margin™ ultrasonics tips.

Data Acquisition

I need to capture accurate data to obtain clinically precise prosthesis.

MEDIT

Intra-oral scanner produces realistic images which are high in resolution and rich in details for easy identification of margin lines and undercuts.

Follow-up

I need to highlight the results of my dental care.

C50

The C50 with AIS give patients a clear view of their condition, enabling them to understand the diagnosis and treatment proposals of their dental professional.

Protection

I need to ensure optimal clinical protection for my patients and limit the risk of cross-contamination.

riskontrol

Riskontrol® disposable tips are your must-have solution to perform dental care in a safe and clean place. It assures protection, comfort and safety in every daily clinical procedures.

EASY IS THE NEW SMART!

- ✔ Easy 2D diagnosis
- ✔ Easy patient positioning
- ✔ Easy user interface
- ✔ Easy installation
- ✔ Easy to use

x-mind prime 2

RELY ON A COMPLETE SET OF PANORAMIC EXAMS

X-MIND® prime offers a full set of panoramic exams for both adult and child, tailored to meet all your clinical applications:

- Panoramic
- Examination of the temporomandibular joints
- Examination of the maxillary sinuses
- Half-panoramic
- Improved orthogonal panoramic
- Detailed frontal dentition
- Low-dose panoramic
- Bite-wing

POSITION EASILY AND EFFICIENTLY YOUR PATIENT

Natural face-to-face positioning supported by alignment lasers for correct patient positioning.

X-MIND® prime is based on a fix & lift principle. Whether sitting or standing at any height, the telescopic columns can be directly adjusted using the control panel.

Its open space configuration suits all types of patients and is easily accessible for wheelchair users, thanks to its zero footprint design.

SIMPLE CONTROL PANEL

The simplified control panel, smartly located below the chin support, provides a streamlined and precise patient positioning.

Benefit from an error-free patient positioning thanks to the automated chin rest support recognition.

THE BRAND VERSION WITH CEPHALOMETRIC ARM

Easy, reliable and safe mobile sensor handling
CEPHALOMETRIC RADIOGRAPHY

With the ACTEON® cephalometric solution entering the X-MIND® prime range, you can now extend the fields of application of the device to orthodontic analysis, improving diagnosis and treatment planning.

2 AVAILABLE CONFIGURATIONS:

- ✔ X-MIND® prime PAN CEPH
- ✔ X-MIND® prime PAN 3D CEPH

X-MIND® prime Pan 2D

Orthopantomograph (OPG), 110V–240V, with one CCD Pan 2D sensor for panoramic imaging.

- 24 adult and child panoramic programs
- Innovative wall-mounted system
- Face-to-face positioning
- Lightest unit on the market
- Installation under an hour by one single technician

ACTEON® maging Suite (AIS) streamlines any clinical workflow from patient data management to images acquisition. AIS 2DApp with its clean interface simplifies the diagnostic phase and allows a better communication with the patient with its portable viewer and dedicated image filters. All Acteon imaging devices can be integrated in the same AIS environment. Installation and user e-manuals, 2 years standard warranty. Not included: light.

Class IIb medical devices (IMQ) - CE0051
Manufacturer: de Götzen ACTEON® Group - Italy

2D Wall-mounted version 110–240V

W1200001

X-MIND® prime Pan 2D CEPH

Orthopantomograph (OPG), 110-240V with single mobile CMOS sensor for panoramic and cephalometric imaging.

Lightweight and compact installation
39 adult and child acquisition programs
Accurate and reliable patient positioning
Fast and easy installation

ACTEON® Imaging Suite (AIS) streamlines any clinical workflow from patient data management to images acquisition. AIS 2DApp with its clean interface simplifies the diagnostic phase and allows a better communication with the patient with its portable viewer and dedicated image filters. All Acteon imaging devices can be integrated in the same AIS environment. Installation and user e-manuals, 2 years standard warranty. Not included: light.

X-MIND® prime Pan 3D

Orthopantomograph (OPG), 110V–240V,
with one CMOS sensor used for Pan and 3D.

- 54 adult and child 2D and 3D programs
- Delivered with AIS 3D app and powerful treatment planning tools
- 4 FOV : 50x50, 85x50, 85x93 and 120x100 mm
- Innovative wall-mounted system
- Face-to-face positioning
- Lightest unit on the market
- Installation under an hour by one single technician

ACTEON® Imaging Suite (AIS) Software, for visualization and analysis of 2D and 3D acquisitions and treatment planning. Includes five licenses for 3D app standard, the 3D viewer and implant planning application. Compatible with all 2D and 3D imaging products of the group. Installation and user e-manuals, 2 years standard warranty. Not included: Light.

true low dose

- 3 in 1 System covering Pan, 3D and Ceph exams
- 3D Mapping of bone density
- 4 FOV: From 4x4 to 11x9
- Up to 50% Dose reduction*
- 75 µm High-resolution image

FOCUS ON THE REGION OF INTEREST

X-MIND® trium offers you a broad selection of field of view, letting you focus on the region of interest for the target diagnosis and reducing the patient's exposure to X-rays:

ø 110x90 mm

ø 80x90 mm

ø 60x60 mm

ø 40x40 mm

* Ratio based on DAP measurements from standard X-MIND® Trium settings 90kV-8mA-300prjs

DOSE REDUCTION WITHOUT COMPROMISES IN IMAGE QUALITY

Up to 50%* dose reduction with TRUE LOW DOSE CBCT

True low dose helps to reduce the X-ray dose while preserving a high image quality. The unique True Low Dose solution is possible thanks to:

IMAGE ENHANCING ALGORITHM

With the new powerful algorithm, you can now decrease the X-ray settings (up to 50%) with peace of mind. Our Low Dose functionality on the 3D radiographic scan will reveal the same anatomical structures of the X-MIND® trium exam performed with the standard dose.

SMART SLIDE MOVEMENT

X-MIND® trium sensor cassette is sliding closer to the child's head during the exam. This allows to reduce the X-ray dose settings while keeping the exact same image quality as before.

BEFORE SLIDE MOVEMENT

AFTER SLIDE MOVEMENT

AN OUTSTANDING IMAGE QUALITY

The quality of the diagnosis and endodontic treatments improves significantly with the 75 µm resolution of X-MIND® trium.

X-MIND® trium TLD Pan 3D

OrthoPanTomograph (OPG), 115-220V, with Flat Panel Detector for CBCT and panoramic imaging.

- Child-dedicated Panoramic and CBCT programs
- Low dose CBCT programs
- Improved Orthogonality
- TMJ section
- Maxillary Sinus exam
- CBCT FOV Ø40x40, Ø60x60, Ø80x90, Ø110x90

Software preinstalled on the provided workstation and monitor.

ACTEON® Imaging Suite (AIS) Software, for visualisation and analysis of 2D and 3D acquisitions and treatment planning. Includes five licenses for 3D app PRO, the 3D viewer and implant planning application.

Compatible with all 2D and 3D imaging products of the group. Installation and user e-manuals, 2 years standard warranty. Not included: Light.

SMART SENSOR FOR EFFORTLESS PERFORMANCE

sopix
plug-in

sopix 2
plug-in

SMART DOSE

The ACE® technology protects both the image and your patient from unnecessary exposure.

AN EFFICIENT PROTECTION WITH A MINIMAL EXPOSURE TIME

The Automatic Control Exposure® technology analyses in real-time the amount of X-rays accumulated by the sensor.

Once the sensors receive the required radiation dose, it orders the X-mind® unit to limit the emission of X-rays. You take an optimal quality x-ray from the first time avoiding overexposure risk to both the image and the patient.

Thus, even with a too high set-up of your generator, the patient receives the minimum dose required to provide a high-quality image.

SMART TECHNOLOGY

Our latest generation of digital sensors provide a sharp X-ray image for an easy reading of the different dental tissues.

EXPERIENCE THE LATEST GENERATION OF DIGITAL SENSORS

The FIBER2PIXEL® technology is based on the use of wide spectrum optical microfibers, guaranteeing the clarity and the contrast of the images.

SMART FLOW

Our mobile sensors adapt to all clinical cases, all morphologies and all software, to provide you and your patients greater comfort.

sopix² plug-in

SOPIX® PLUG-IN size 1 with SOPIX® Plug-in dock

3.800,70 € S_K60_1000

SOPIX® PLUG-IN size 2 with SOPIX® Plug-in dock

SUPERIOR COMFORT AT YOUR FINGERTIPS

The next generation of manual instrumentation

- Lightweight: 15g
- Unique "Soft Touch" grip
- Long lasting sharpness⁽¹⁾
- 100% approved by practitioners⁽²⁾

UNCONVENTIONALLY DURABLE AND SOLID

- High wear-resistance due to the stainless steel properties
- The metal is treated in accordance with the latest heating techniques

ENHANCED COMFORT THE FINAL GOAL

- High sharpness means less force
- Less force means less muscle fatigue
- Less force means comfortable scaling

Manual instrumentation video

TRUE ERGONOMICS

- 10mm: optimal handle diameter to reduce pinch force⁽³⁾
- 15g: ultra light to limit hand fatigue⁽³⁾

UNIQUE COMFORT

- Flat areas for the fingers, to avoid localized pressure
- Intrinsic tactile sensation

GENTLE AND CONFIDENT GRIP

- Effective «soft touch» non-slip surface
- Firm silicone with no spring effect for an accurate and controlled clinical gesture

REVOLUTIONARY COMFORT AT YOUR FINGERTIPS

39 instruments

- Diagnostic
- Restoration
- Periodontics
- Endodontics
- Prophylaxis

(1) The effects of periodontal instrument handle on hand muscle load and pinch force, D. Rempel; D. Lee; K. Dawson; P. Loomer; JADA 143 (10) - October 2012.

(2) Internal field evaluation on 20 practitioners from 8 different countries. 100% answered that Bliss handle was comfortable.

(3) Rempel D, Lee D.L., Dawson K, Loomer P. The effects of periodontal curette handle weight and diameter on arm pain. JADA. 2012 Oct;143(10)

Kits

Every consultation starts with these 3 instruments

One end of the handle is flat to facilitate percussive diagnostics, allowing to evaluate the sensitivity and the mobility of the tooth and the sensitivity of the gum.

MIRROR RANGE

.....

PERFECT CLARITY, CRYSTAL-CLEAR VISION

MOUTH MIRRORS - FROM DIAGNOSTIC TO TREATMENT, THE BENEFIT TO ALL DENTAL CLINICAL ACTS

- Visual examination is the first step to diagnostics
- 10 different sizes
 - From 0 to 6 to work in the mouth
 - From 7 to 10 to clinical studies, photography

MICROMIRRORS - THE MICROSCOPIC PERFECTLY VISIBLE

- Make the access to the apex easier and appreciate the accurate vision of the pulp chamber.
- 4 different sizes

PHOTOGRAPHIC MIRRORS - EFFECTIVE COMMUNICATION WITH PATIENTS

- Highlight the dental treatment and restoration to promote the practice. Allow to take pictures of clinical cases for books, publications and patient records.
- 8 different sizes for occlusal, vestibular and lingual areas.

Our mirrors resist to more than 100 autoclave cleaning cycles*

Mirrors has to be replaced after 3 MONTHS of daily use

Front surface

Cross-sectional view

Image reflected directly on the surface of the glass, distortion-free
NO DOUBLE IMAGE

Back surface

Cross-sectional view of an aluminium mirror

Reflecting surface under the glass
DOUBLE IMAGE

The finition of the frame also matters

Flat and ergonomic soldering
More comfortable for the patient while retracting the cheek

Satined finition

Prevent light reflection in the eyes
Avoid eye fatigue

Optimal crimping
The frame suits the mirror
No sharp edges
No blood and dirt retention

expasyl

ENHANCE YOUR IMPRESSION ACCURACY

A TRIPLE ACTION

1 ASTRINGENT EFFECT

helps to completely dry the sulcus with no blood or fluids.

2 OPEN THE SULCUS

effectively with no pain or damage to tissues thanks to the viscosity carefully calculated with our clinical expertise.

3 PRESERVE EPITHELIAL ATTACHMENT*

for a reduced risk of gingival recession and bone resorption.

* Canula must not be inserted into the sulcus

EXPASYL™ PASTE USED BY EXPERTS

97% of Expasyl™ paste users would recommend this product to a colleague*

93% of Expasyl™ paste users say that the sulcular opening obtained with the product is ideal for impression taking*

94% of Expasyl™ paste users find that the application is very easy*

WHY CHOOSE EXPASYL™ RETRACTION PASTE?

Compared to traditional cords, Expasyl™ paste preserves gingival tissues and epithelial attachment.⁽¹⁾

Expasyl™ paste generates pressure 1.7 to 9.2 times greater than other retraction paste available on the market.⁽²⁾

ENSURE COMPLETE SUCCESS OF YOUR PROSTHETIC RESTORATIONS

hycal

Ready-to-use calcium hydroxide paste

Indications

Hycal™ is a calcium hydroxide paste indicated for application:

- Direct capping when pulp opened or after pulpotomy.
- Indirect capping for treatment of deep caries.
- Lining of cavities to prevent exposure to acid media when using cements
- Temporary filling of root-canals.

Properties

- Product ready to use.
- High pH (>12.5)
- Effective protection of the pulp.
- Formation of tertiary dentin.
- Radio-opaque.

sealite regular

Powder and liquid for permanent sealing cement for root canals

Properties

Cement allows the tooth to remain functional.

Forms an easy-to-apply, tight (very low solubility and disintegration after setting, in compliance with ISO 6876:2012), radiopaque cement with a homogeneous consistency.

Must be used with gutta percha cones.

Composition

- Sealite™ Regular powder: Diiodothymol - Zinc oxide - Radio-opacifier - Excipients
- Sealite™ Liquide: Eugenol - Excipients

Sealite™ Regular kit

25g of Sealite™ Regular Powder⁽¹⁾, 10ml of Sealite™ Liquide⁽¹⁾,
1 spoon⁽²⁾, 1 dropper⁽²⁾

cimavit

Zinc oxide-based temporary filling cement

Properties

- Ready-to-use (no mixing)
- Waterproof
- Very good adherence to dentine
- Immediate setting time in mouth
- Easy to remove (probe, excavator, ...)
- Pink colour for a good contrast

Cimavit™

6 x 28g jars

76,80 € 213 859

Class IIa medical device (TUV Rheinland) - CE 0197 - Manufacturer: G-Pharma - France
Distributed by: PRODUITS DENTAIRE PIERRE ROLLAND ACTEON® Group - France

cimavit photo

Light-curing filling material for temporary restorations

Indications

All types of temporary fillings, temporary protection in inlay and onlay techniques

Properties

Ready-to-use material, does not stick to instruments, condensable, does not require a particular finishing of the cavity, ensures a hermetic seal (isolates the tooth from bacterial and thermal aggression).

In case of more than two weeks' stay in mouth, and in occlusal or marginal areas, reinforcement with composite is recommended.

Good aesthetic translucency. Its elastic consistency facilitates its removal in one bloc.

Cimavit™ Photo

PROPHYLAXIS & PERIODONTICS

.....

etik collagene

Hemostatic surgical dressing

Properties

Collagen is a fibrillar protein naturally present in all connective tissues. Lyophilized collagen in cylindrical form displays hemostatic activity due to its adhesive power, liquid absorption and gelification properties. The collagen cylinder moulds itself into the hemorrhagic surface where it adheres strongly upon mechanical compression, thus promoting the formation and maintenance of a platelet clot (coagulation). The collagen cylinders are resorbable.

Composition

Native, non-denatured, lyophilized bovine collagen (mainly type I collagen): 100%. This device contains tissues of animal origin under regulation (EU) no. 722/2012. Dimensions: diameter ≈ 10mm, height ≈ 16mm

Etik™ Collagene

25 unit-packaged sterile cylinders (in blister packs)

Class III medical device (GMED) - CE 0459 - Manufacturer: PRODUITS DENTAIREs PIERRE ROLLAND ACTEON® Group - France

hemostasyl

Hemostatic surgical dressing

Indication

To be used in all cases of moderate bleeding occurring in routine dental practice (scaling, etc.)

Properties

- Thixotropic properties
- Good adhesion to the gingival mucosa, without compression
- Presence of aluminum chloride which reinforces its mechanical haemostatic effect
- Placed directly in the mouth with the single-use angled cannula
- Easily located due to its color
- Easily removed by gentle water spray without resumption of bleeding
- Painless on a healthy periodontium
- Contact time: 2 minutes max.

HYGIENE

.....

METALLIC TIPS

DID YOU KNOW?

It is impossible to clean correctly the inside of reusable tips due to the presence of biofilm.⁽¹⁾

Metallic tip after 1 year use

- Not effective cleaning of reusable tips in the long-term.
- Hygiene maintenance takes time between two patients.

With regard to cleaning and sterilization, disposable tips were found to be more acceptable in clinical use than metal tips.⁽¹⁾

(1) M. Inger, V. Bennani, M. Farella, F. Bennani, R.D. Cannon. Efficacy of air/water syringe tip sterilization. Australian Dental Journal 2014; 59: 87-92 - R. Puttaiah et al. Rationale for using single-use disposable air/water syringe tips. Compendium. 1999;20(11):1056-1069

Adapters for air/water syringe

The Riskontrol® range includes different adapters able to equip about a large number of dental chairs.

The adapter is left permanently in place. You just need to change the tips between each patient.

The adapters are delivered with 1 protective cap and, depending on the types, with a replacement O-ring to ensure optimal functioning of your syringe.

Contact your area dealer to determine the correct adapter for your dental chair.
